

START AID

FOR CALVES WITH DIARRHOEA

A HIGH ENERGY ELECTROLYTE

Est. 1986

IRELAND

Nutrition Based Health

Feeding Instructions:

For oral use in calves. Add 1 sachet (80gm) to 2 litres of water and mix thoroughly. This amount should be fed twice daily until diarrhoea stops. Start aid may be mixed with warm or cold water. However calves prefer a warm solution. For mild nutritional diarrhoea it can be added directly to milk. Clean fresh water should be available. Milk need not be withdrawn from the calf's diet.

Recommended use

START AID is a dietetic feedingstuff recommended for the improvement of water and electrolyte balance in calves. Contains electrolytes and easily absorbable sugars. It may be used during periods of, or recovery from digestive disturbance (diarrhoea). It is recommended that a veterinarian's opinion be sought before use.

Precautions:

For animal use only. Keep out of reach of children. Remove unused solutions after 24 hours. Do not exceed recommended amount. Consult your veterinary surgeon before use.

Storage Conditions:

Keep out of sunlight. Store in a dry place below 25°C.

Analytical Constituents: Crude Ash 13.0%, Moisture 6.5%, Crude Oil & Fat 0.1%, Crude Fibre 0.1%, Crude Protein 1.8%, Sodium 3.5%, Chloride 4.8%, Potassium 1.5%, Phosphorus 0.3%, Total Sugars 79% **Composition** Glucose, Sodium Chloride, Potassium Chloride, Yeast Cell Wall, Monopotassium Phosphate **Additives per 100g, Vitamins** α -tocopherol 3a700 250mg, Thiamine Hydrochloride 7.5mg, Riboflavin 11.5mg, Pyridoxine Hydrochloride 4mg, Cyanocobalamin 15mcg, Ascorbic Acid E300 400mg, Calcium-D Pantothenate 15mg, Nicotinic acid 500mg **Amino acids, their salts and analogues:** Threonine 3.3.1 2% **Preservatives:** Sodium Citrate - E331 4,500 mg **Trace Elements per 100g** Cupric Sulphate Pentahydrate E4 44mg, Cupric Chelate of Glycine Hydrate E4 150mg, Ferrous Sulphate E1 26mg, Ferrous Chelate of Glycine Hydrate E1 312mg, Zinc Chelate of Glycine Hydrate E6 150mg

Batch Number: Printed on packaging

Expiry Date: 30 months from date of manufacture

F Electrolyte pour veaux, à triple action et haute teneur énergétique

Notice d'utilisation : Par voie orale chez les veaux. Ajouter 1 sachet (80 gr) à 2 litres d'eau et bien mélanger. Alimentation à volonté dans un conteneur propre. Administrer cette quantité deux fois par jour. On peut mélanger START AID dans de l'eau chaude ou froide, en notant bien que les veaux préfèrent une solution chaude.

D Eine energiereiches, dreifach wirkendes Elektrolyt für Kälber

Verabreichung: Nur zum oralen Gebrauch bei Kälbern. 1 Beutel (80g) in 2 Liter Wasser auflösen und gut vermischen. Nach Bedarf in einem sauberen Behälter verabreichen. Diese Menge sollte zweimal täglich verabreicht werden. START AID kann in kaltem oder warmen Wasser gemischt werden. Kälber ziehen jedoch eine warme Lösung vor.
